

# *The Down Syndrome Community of Long Island*

*proudly invites you to show your support and attend a lecture in celebration of*

## *World Down Syndrome Day*

*at Cold Spring Harbor Laboratory*

### **Keynote Speaker –Roger H. Reeves, Ph.D.**

*Professor, Department of Physiology, McKusick-Nathans Institute of Genetic Medicine, Johns Hopkins  
Principal Investigator of the Reeves Laboratory, Johns Hopkins University*

Opening Remarks by *Congressman Steve Israel*

Closing Remarks by Lisa Kaeser of the *National Institutes of Health*

**Sunday, March 21st, 2010**

**3:00 PM**

Grace Auditorium

One Bungtown Road  
Cold Spring Harbor, NY

### *Theory to Therapeutics in Mice and Men with Down syndrome*

The mapping of human genome and the creation of advanced technologies for scientific research have opened up a whole new world of opportunities in the field of Down syndrome research. Come and learn about how recent studies are beginning to identify the gene(s) responsible for cancer, congenital heart defects and cognitive impairment. Down syndrome research is now on the brink of helping not only those with Down syndrome, but all individuals touched by cancer, Alzheimer's disease and cardiac defects.

RSVP at [info@dsccli.org](mailto:info@dsccli.org) or call Virginia at (631) 261-8332

Co-sponsored by the National Down Syndrome Society, the Down Syndrome Connection of Long Island and the Association for Children with Down Syndrome
